Saichander Reddy Vorem

DevOps engineer & Cloud Infrastructure Consultant

Personal Data

Address	Lena-christ-str 6, 80807, Munich	**Date / Birthplace**	23.07.1995, India
E-Mail	**saichander944@gmail.com**	**Tele**	015254911684

Professional Experience

DevOps Engineer with 7+ years of experience in Cloud Delivery and enterprise cloud platform operations, specializing in Microsoft Azure and Kubernetes-based environments. Strong expertise in Infrastructure as Code (Terraform, Ansible), CI/CD automation (GitHub Actions, ArgoCD), monitoring (Prometheus, Grafana), and secure cloud architecture. Experienced in collaborating with cross-functional product teams, security experts, and regional operations teams to deliver highly available and compliant cloud solutions in regulated enterprise environments.

06.2022 - Present DevOps Engineer & Cloud Consultant, Cluster Reply GmbH – BMW, Munich,Germany

- Designed and operated Azure-based Kubernetes (AKS) platforms for enterprise-grade cloud-native applications, ensuring high availability and secure production operations.
- Developed and maintained CI/CD pipelines using GitHub Actions and ArgoCD, improving deployment reliability and supporting automated product operations.
- Adopted GitOps principles for continuous delivery, improved traceability, and minimizing configuration drift across environments.
- Automated infrastructure provisioning with Terraform modules and Ansible, improving consistency and reducing configuration drift.
- Experienced with Docker container service and Dockerization of applications by creating Docker images from Dockerfile
- Designed and managed Helm charts for AKS workloads, supporting reusable, version-controlled application deployments and seamless integration with CI/CD pipelines.
- Worked in enterprise cloud environments with strict compliance, data protection, and security requirements, aligning platform operations with regulated cloud and corporate governance standards.
- Supported incident troubleshooting and root cause analysis in production environments, ensuring SLA compliance and system stability.
- Implemented Kubernetes security and compliance policies (Kyverno), reducing misconfigurations and strengthening cloud security posture.
- Acted as technical lead for selected automation initiatives, coordinating tasks across developers and operations teams.
- Contributed to Cloud Delivery processes including deployment enablement, release coordination, and operational readiness across environments.
- Architected and maintained BMW's enterprise API gateway platform on Microsoft Azure, managing 20+ global automotive APIs using Azure API Management, Azure Front Door CDN, and Application Gateway with WAF.

Tools: Azure, AWS, Cloud Architecture & Design, Cross-Functional Collaboration, Terraform, CI/CD automation (GitHub Actions, ArgoCD), Kubernetes & Container Orchestration, Helm Charts, API Management, Security & Compliance in Regulated Cloud Environments, Elastic search, Prometheus and Grafana, Jenkins, Kafka, Confluence, Incident Management & SLA Support.

06.2025 – 09.2025 IT Engineer, Nokia, Munich, Germany (Freelance – Project based)

- Led the setup of IT rooms for new office locations, overseeing installation of firewalls, switches, routers, and servers.
- Coordinated on-site activities, including rack mounting, cabling, and device configuration, to ensure projects were delivered on time.
- Acted as a liaison between on-site teams,HCL back-end team and Nokia Project manager, streamlining communication and ensuring server rooms met operational requirements.

09.2019 – 02.2022 Hardware Network Engineer, E.ON, Hannover, Germany (Freelance – project based)

- Conducted eyeball checks for physical infrastructure in data centers.
- Managed data centers and troubleshooting issues with switch interfaces, checking cable connectivity.
- Provided preventive maintenance for servers and storage equipment.

AI & MLOps Interest and Development

- Building foundational knowledge in AI infrastructure, distributed training concepts, and scalable model serving.
- Exploring PyTorch-based workflows and GPU-accelerated workloads within Kubernetes environments.
- Interested in optimizing compute, storage, and networking layers for AI training and inference systems.

Courses and Certifications

Terraform Certified Associate	**Certificate**
GitOps with ArgoCD	**Certificate**
Microsoft Certified: Azure Administrator Associate	**Certificate**
Microsoft Certified: Azure Solution Architect	**Certificate**

Academic Career

04.2022 – present **Computational Methods in Engineering**
Leibniz University of Hannover, Hannover, Germany Degree: Master of science

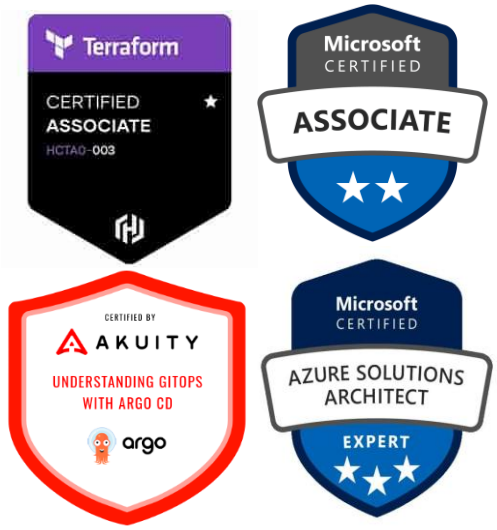
10.2013 – 05.2017 **Automobile Engineering, B.E (Grade: 2.1)**
Osmania University, Hyderabad, India Degree: Bachelor of Engineering

Knowledge and skills

Languages

English	Fluent (C2)
German	Intermediate (B1)

Technical Skills

Version Control Tools	GitHub, Gitlab
Containerization	Docker
Orchestration	Kubernetes, Docker- Swarm
Configuration Management	Ansible
Testing Tools	Selenium
Continuous integration	Jenkins, Github Actions
Continuous Deployment	ArgoCD, Github Actions
Monitoring tools	Nagios, Prometheus and Grafana,Elasticsearch
Cloud Technologies	Azure, AWS
OS	Windows, Ubuntu, Linux
AWS DevOps	Code Commit, Code Build Code Deploy, Code Pipeline
Languages	Python, C, Matlab Scripting


License and Certification
